

**PACKAGING**

**MIXING**

**APPLICATION**

**USES**

**SUBSTRATES**

**DESCRIPTION**

**Super Prime** is a water based acrylic primer with solvent like penetration properties for use on smooth/helicoptered/steel trowelled concrete. **Super Prime** improves adhesion and reduces air bubbles from rising through levelling compounds.

**USES**

A primer for smooth, helicoptered concrete floors, that penetrates through the impervious laitance layer and improves the adhesion of subsequent toppings.

**FEATURES**

- Exceptional adhesion to smooth concrete.
- Reduces air bubbles rising through levelling compounds.
- Eliminates the need to etch or scabble concrete.
- Has solvent like penetrating properties.

**COVERAGE**

8-10m<sup>2</sup>/litre.

**PERFORMANCE DATA**

Tensile adhesion pull-off strength in excess of 1.5 Mpa.

**SPECIFICATION**

The primer will be a water based acrylic with a minimum tensile adhesion strength exceeding 1.5 Mpa to smooth helicoptered concrete such as **Super Prime** manufactured by Construction Chemicals and shall be applied in accordance with the manufacturers instructions.

**SURFACE APPLICATION**

The substrate must be sound and clean, free from dust, dirt, waxes, paint, and curing compounds and release agents.

**APPLICATION**

Shake the container well before use. Apply the **Super Prime** to sound, clean substrates. It is advisable to do a test area to determine the suitability of the product. Apply with a stiff brush or broom, forcing the primer well into the surface. Apply the topping when the primer is dry or tack free, i.e. after 2-3 hours. Very absorbent concrete may require 2 coats.

DO NOT dilute, DO NOT leave bare spots, DO NOT use on continuously damp surfaces, i.e. swimming pools, shower bases.

**SHELF LIFE**

2 years.
