SUBSTRATES

DESCRIPTION

SUPER PRIME is a water based acrylic primer with solvent like penetration properties for use on smooth/helicoptered/steel trowelled concrete. SUPER PRIME improves adhesion and reduces air bubbles from rising through levelling compounds.

USES

A primer for smooth, helicoptered concrete floors, that penetrates through the impervious laitance layer and improves the adhesion of subsequent toppings.

FEATURES

- Exceptional adhesion to smooth concrete.
- Reduces air bubbles rising through levelling compounds.
- Eliminates the need to etch or scabble concrete.
- Has solvent like penetrating properties.

COVERAGE

8-10m²/litre.

PERFORMANCE DATA

Tensile adhesion pull-off strength in excess of 1.5 Mpa.

SPECIFICATION

The primer will be a water based acrylic with a minimum tensile adhesion strength exceeding 1.5 Mpa to smooth helicoptered concrete such as SUPER PRIME manufactured by Construction Chemicals and shall be applied in accordance with the manufacturers instructions.

SURFACE APPLICATION

The substrate must be sound and clean, free from dust, dirt, waxes, paint, and curing compounds and release agents.

APPLICATION

Shake the container well before use. Apply the SUPER PRIME to sound, clean substrates. It is advisable to do a test area to determine the suitability of the product. Apply with a stiff brush or broom, forcing the primer well into the surface. Apply the topping when the primer is dry or tack free, i.e. after 2-3 hours. Very absorbent concrete may require 2 coats.

DO NOT dilute, DO NOT leave bare spots, DO NOT use on continuously damp surfaces, i.e. swimming pools, shower bases.

SHELF LIFE

2 years.
