MATERIALS:

Kemscreed / Liquid Flash II (two pack, water-based flexible water proofing membranes), Crystal Sealer (cement based compound that waterproofs by crystal formation), Reinforced Render (fibreglass reinforced cement), Bonding Additive (acrylic bonding additive).

SURFACE PREPARATION:

All surfaces must be clean and sound and free of grease, dust, coatings and other contaminants.

WORKMANSHIP:

Apply products in accordance with the manufacturers written instructions and good trade practice.

APPLICATION:

CONCRETE TANKS

Kemscreed and Liquid Flash II is a two pack water-based flexible membrane. Curing time is 3 days at 20°C.

Crystal Sealer is a cement compound that forms crystals in cement based substrates permanently waterproofing the surface.

GALVANISED IRON TANKS

Dribond Render mixed with Bonding Additive is recommended as a liner on the inside of galvanised iron tanks because it will plug pin holes and protect the iron from further corrosion. Curing time: 2-3 days at 20°C.

Screed if required

Should a base screed be required use a 1 : 3 cement : sand mortar mixed with 1 : 3 Bonding Additive; water mixture.

Estimating Chart for Tank Repair

GALLONS/LITRES	FLOOR M ²	WALL M ²	TOTAL M ²
1000/4657	2.54	10.35	12.89
2000/9127	4.99	14.49	19.48
3000/13370	7.31	17.53	24.84
